

WELCOME TO OUR SERVICE

Child Development Services are committed to working together to meet the needs of your child and family/whanau and we understand that there are often difficult times, so please talk with your therapist, Paediatrician or GP if you feel social work could offer some assistance.

Social Workers are professionally trained to help support children and families/whanau in dealing with the impact of disability on family life. Our commitment is to care for the social and emotional needs of children and their families/whanau, within Child Development Services.
