

Important Changes at Wairau Hospital

Access into Emergency and Main Entrance altered

During part of the first stage of construction; the new build of inpatient wards on the west side of the site, there will be some alterations to the access to the Main Entrance and Emergency Departments.

To allow Hawkins to fully complete the first phase -

- Site fencing will be erected up to the landscaped planted island outside the Main Entrance.
- The roundabout will be removed along with the existing car parking.
- No parking will be allowed in this area during construction and is a drop off and pick up only zone.
- Vehicle users will be directed to move to the car park areas after dropping off passengers.

All efforts will be made to minimise any disruption to normal business operations and ensure staff and public can continue to access the facility as easily as possible during this time.
