

Important Changes at Wairau Hospital

Entrance to Arthur Wicks Building

From Monday, February 2, the ground floor entrance to the Arthur Wicks building at Wairau Hospital will be blocked off permanently to allow construction of a new server room.

The closure of this entrance, off the main public car park off Gate 3, will allow for the Wairau Hospital Site Redevelopment Project to progress.

Patients and visitors are advised to use the Main Entrance of the hospital through Gate 3 to access Wards 3 and 4, Medical Outpatients, ECG (electrocardiogram), Day Stay, Mammography, and Ultrasound.

Appropriate signage will be available to guide all visitors through the hospital.

We appreciate your patience during this stage of the redevelopment.

For more information regarding hospital entrances, please contact Susannah Findlay, Communications Coordinator, Wairau Hospital Site Redevelopment, phone 520 9999.
